

TICK TOCK, SUMMER IS COMING!

Millions of tourists are heading this way. How will you contact them when they're nearby, in your establishment or browsing next door?

Our one hour promise!

Social wifi is a quick and easy 1 hour installation that either adds to what you have and puts you in direct communication with anyone using it on a connected device.

Providing offers, menus, services and vouchers in real time helps increase spend and encourage repeat custom.

Our clients - Rick Stein, The Headland Hotel and The Beach at Sennen see this as a key marketing tool.

Get social wifi for Summer

Now is the time to make your current wifi system work better for you.
